Testing the servlet

- `localhost:8080/SelectCountry/country?queryToken=I`

Form (index.jsp)

```

  <head>
    <script type="text/javascript"
src="getcountries.js"></script>
    <meta http-equiv="Content-Type" content="text/html;
charset=UTF-8">
    <title>Select Country</title>

Form (index.jsp)

```
<form name="registrationForm" action="register">
  <table border="0" cellpadding="5">
    <tr>
      <td>Country:</td>
      <td><input type="text" name="country" id="country"

      <datalist id="countryList">

</table>
</form>
</body>
</html>
```

At runtime, we will add
<option /> for each country
E.g., <option value="India" />
